

4 TOOLS

YOU NEED TO CARE FOR YOUR

LEATHER SHOES

1

SHOE TREE

A shoe tree is a block shaped to fit the inside of a shoe. It is inserted in a shoe when the shoe is not in use. Shoe tree must be used regularly so that the shoe retains its perfect shape for a long time.

2

Shoe horn is a spoon-like tool used to put on shoes. The handle helps glide the foot into the shoe while the horn protects the shoe's heel and prevents it from being crushed.

SHOE HORN

3

MICROFIBER CLOTH

Microfiber cloth is a fine cleaning cloth that cleans better and faster without damaging the surface. Leather must be kept clean off of dust and dirt. The cleaner you keep your leather, the longer it will last.

4

SHOE SHINER

A shoe shiner is a sponge that helps you evenly apply a thin layer of liquid shoe polish onto your leather shoes so as to keep the leather healthy and lustrous.

Check out our website www.cobblestone.shoes to find out more about real leather. We hand-craft and sell Full-Grain & Top Grain Leather shoes for men.
